

ABC Multispeciality Hospital

Department of Radiology (MRI Unit)
Patna, Bihar | Phone: +91-9876543210

Patient Name	Daya Sharma
Patient ID	PT-2026-00125
Age / Gender	28 Years / Male
Referring Doctor	Dr. Rajesh Kumar
Examination	MRI Brain (Plain)
Date	02 July 2026

Clinical History

Patient presented with recurrent headaches and dizziness.

Technique

MRI Brain performed using standard T1, T2, FLAIR, DWI, and ADC sequences without intravenous contrast.

Findings

The cerebral hemispheres demonstrate normal signal intensity. No evidence of acute infarct, intracranial hemorrhage, mass lesion, or midline shift. Ventricular system is normal in size and configuration. Basal ganglia, brainstem, and cerebellum appear unremarkable. No abnormal extra-axial collection is identified.

Impression

MRI Brain is within normal limits. No significant intracranial abnormality detected.
